PHP

I'm currently A student in Aptech, Garden Center, Karachi, Pakistan, I am 18 Years old, and My Life Revolves Around Programming, Even when I'm sleeping I think of which block of code would finally do the trick, and work it's magic on my project. Although I'm at an age where people try to 'find' themselves, i already am ready to devote my life to blocks of code, and eventually hone my skills to a certain level where I can not only dream, but also live my dreams according to my imagination. While creating a program even the easiest code such as Print('Hello World!') brings me immense joy, and a sense of hopefullness for my future. I'm looking for a place where i could work, and learn about the millions of things about programming, I've yet to discover. At the moment I don't want to stop my learning. I say this but hopefully I never want myself to stop learning. With this boring introduction finally ending, i hope you like my Portfolio, And give me a chance.
